# SOURCE 2: [HTTPS://COPILOT.CLOUD.MICROSOFT/EN-US/PROMPTS](https://copilot.cloud.microsoft/en-us/prompts)

The screenshot shows the Microsoft Copilot Lab website. At the top, there is a navigation bar with the Microsoft logo, 'Copilot Lab', and links for 'Explore in products', 'Prompts to try', 'Getting started', and 'What's new'. On the right, there are search and sign-in options. The main header features a large 'Copilot Lab' title over a background of colorful, glowing lines. Below this, a section titled 'Start your Copilot journey' contains four video thumbnails: 'Meet Copilot', 'What you can do with Copilot', 'Start using Copilot', and 'What is a prompt?'. The bottom section, 'Copilot in your everyday apps', displays icons for various Microsoft applications: Copilot, Word, PowerPoint, OneNote, Outlook, Excel, Teams, Windows, and OneDrive.

  - Business
  - Education
  - Fun
  - Image
  - Coding etc.

The screenshot shows the 'Prompt Database' interface. At the top, there's a 'Popular' tag and a page number '25'. Below the title is a search bar with the text 'Search through the collection of prompts or submit your own to the database.' and a 'Search' button. The main content is a table with columns for 'Prompt Name', 'Author', and 'Upvotes'. The first row shows a prompt titled 'PowerPoint Generator' by '@hey\_madni' with 44 upvotes. Below the table, the 'Instruction' and 'Prompt' text are visible. The 'Instruction' text reads: 'READ THIS FIRST! This prompt will create an outline for a PowerPoint presentation. it's a two part prompt. This will give you the titles and top level content. This works best in GPT4 but also works in 3.5. This will work for a smaller number of slides but longer slide decks will not work and you should do them in sections. To begin this prompt you should copy and paste in this first prompt You are an [expert role]. Write an outline for a PowerPoint presentation (No. of slides) on [your topic]. Focus on the benefits of [your theme] Here is an example: You are a expert [SEO specialist] Write an outline for a PowerPoint presentation (5 slides) on [the use of techniques to increase traffic to websites]. Focus on the benefits of [increased traffic] Second Prompt (this is then to be used after the output from prompt 1 Now write all the VBA code to create the PowerPoint slides for this deck. The text should be centered on the slides and aligned to the left. Once this has been completed and you have VBA code, Open up PowerPoint then Press Alt + F11 on Windows or Option + F11 on Mac. Click "Insert" and select "Module" then simply Paste the code, and click the Play button Your slides will generate themselves! The slides generated will look boring, don't worry! Click on the "Designer" option, then choose a layout that suits your needs. Generate custom images from Dalle 3 or Midjourney to add that extra level of spice.' The 'Prompt' text reads: 'Prompt 1 You are an [expert role]. Write an outline for a PowerPoint presentation (No. of slides) on [your topic]. Focus on the benefits of [your theme] Prompt 2 Now write all the VBA code to create the PowerPoint slides for this deck. The text should be centered on the slides and aligned to the left.' A 'Copy' button is visible at the bottom right of the prompt text. The second row of the table shows a prompt titled 'Financial Concepts Unleashed: An Exploration through the Animal Kingdom' by 'Boldwool' with 17 upvotes.

Prompt Name	Author	Upvotes
PowerPoint Generator	@hey_madni	44
Financial Concepts Unleashed: An Exploration through the Animal Kingdom	Boldwool	17

*Thank You*
